Results Detailed

Empty link

What It Means

A link contains no text.

Why It Matters

If a link contains no text, the function or purpose of the link will not be presented to the user. This can introduce confusion for keyboard and screen reader users.

How To Fix It

Remove the empty link or provide text within the link that describes the functionality and/or target of that link.

The Algorithm...In English

An anchor element has an href attribute, but contains no text (or only spaces) and no images with alternative text.

WCAG 2.1 Success Criteria:

[2.4.4 Link Purpose \(In Context\) \(Level A\)](#)

Very low contrast

What It Means

Very low contrast between text and background colors.

Why It Matters

Adequate contrast of text is necessary for all users, especially users with low vision.

How To Fix It

Increase the contrast between the foreground (text) color and the background color. Large text (larger than 18 point or 14 point bold) does not require as much contrast as smaller text.

The Algorithm...In English

Text is present that has a contrast ratio less than 4.5:1, or large text (larger than 18 point or 14 point bold) has a contrast ratio less than 3:1. WCAG requires that page elements have both foreground AND background colors defined (or inherited) that provide sufficient contrast. When text is presented over a background image, the text must have a background color defined (typically in CSS) that provides adequate text contrast when the background image is disabled or unavailable. WAVE does not identify contrast issues in text with CSS transparency, gradients, or filters.

WCAG 2.1 Success Criteria:

[1.4.3 Contrast \(Minimum\) \(Level AA\)](#)

Broken ARIA menu

What It Means

An ARIA menu does not contain required menu items.

Why It Matters

ARIA menus are application menus (like those used in software menu) with a specific keyboard interactions. They are NOT for navigation links on a web site and must contain at least one menuitem, menuitemcheckbox, or menuitemradio element.

How To Fix It

Ensure that the menu is an application menu and has the appropriate keyboard interactions (menu items are navigated via the arrow keys, not via the Tab key) and internal menu items, otherwise remove the menu role.

The Algorithm...In English

An element with role="menu" does not contain at least one element with role="menuitem", role="menuitemcheckbox", or role="menuitemradio".

WCAG 2.1 Success Criteria:

[2.1.1 Keyboard \(Level A\)](#)

[4.1.2 Name, Role, Value \(Level A\)](#)

Page	Text	HTML

Empty button

What It Means

A button is empty or has no value text.

Why It Matters

When navigating to a button, descriptive text must be presented to screen reader users to indicate the function of the button.

How To Fix It

Place text content within the <button> element or give the <input> element a value attribute.

The Algorithm...In English

A <button> element is present that contains no text content (or alternative text), or an <input type="submit">, <input type="button">, or <input type="reset"> has an empty or missing value attribute.

WCAG 2.1 Success Criteria:

[1.1.1 Non-text Content \(Level A\)](#)

[2.4.4 Link Purpose \(In Context\) \(Level A\)](#)

Linked image missing alternative text

What It Means

An image without alternative text results in an empty link.

Why It Matters

Images that are the only thing within a link must have descriptive alternative text. If an image is within a link that contains no text and that image does not provide alternative text, a screen reader has no content to present to the user regarding the function of the link.

How To Fix It

Add appropriate alternative text that presents the content of the image and/or the function of the link.

The Algorithm...In English

An image without alternative text (missing alt attribute or an alt value that is null/empty or only space characters) is within a link that does not contain text and an image with alternative text.

WCAG 2.1 Success Criteria:

[1.1.1 Non-text Content \(Level A\)](#)

[2.4.4 Link Purpose \(In Context\) \(Level A\)](#)

https://www.georgiancollege.ca/future-students/		

Redundant title text

What It Means

Title attribute text is the same as text or alternative text.

Why It Matters

The title attribute value is used to provide *advisory* information. It typically appears when the users hovers the mouse over an element. The advisory information presented should not be identical to or very similar to the element text or alternative text.

How To Fix It

In most cases the title attribute can be removed, otherwise modify it to provide advisory, but not redundant information. Note that the title text may or may not be read by a screen reader and is typically inaccessible to sighted keyboard users.

The Algorithm...In English

A title attribute value is identical to element text or image alternative text.

Redundant link

What It Means

Adjacent links go to the same URL.

Why It Matters

When adjacent links go to the same location (such as a linked product image and an adjacent linked product name that go to the same product page) this results in additional navigation and repetition for keyboard and screen reader users.

How To Fix It

If possible, combine the redundant links into one link and remove any redundant text or alternative text (for example, if a product image and product name are in the same link, the image can usually be given alt="").

The Algorithm...In English

Two adjacent links go to the same URL.

Noscript element

What It Means

A <noscript> element is present.

Why It Matters

Content within <noscript> is presented if JavaScript is disabled. Because nearly all users (including users of screen readers and other assistive technologies) have JavaScript enabled, <noscript> cannot be used to provide an accessible version of inaccessible scripted content.

How To Fix It

Ensure that scripted content is accessible. The <noscript> content will be presented to very few users, but must be accessible if used.

The Algorithm...In English

A <noscript> element is present.

<https://www.georgiancollege.ca/> <noscript></noscript>

What It Means

An event handler is present that may not be accessible.

Why It Matters

The JavaScript events in use do not appear to be accessible to both mouse and keyboard users. To be fully accessible, critical JavaScript interaction should be device independent.

How To Fix It

Ensure that critical functionality and content is accessible by using a device independent event handler (which responds to both keyboard and mouse) or by using both a mouse dependent and a keyboard dependent event handler.

The Algorithm...In English

One of the following is present:

- an onmouseover event but not an onfocus event
- an onclick event on something other than a link, form control, or element with a tabindex value of 0
- ondblclick

WCAG 2.1 Success Criteria:

[2.1.1 Keyboard \(Level A\)](#)

Skipped heading level

What It Means

A heading level is skipped.

Why It Matters

Headings provide document structure and facilitate keyboard navigation by users of assistive technology. These users may be confused or experience difficulty navigating when heading levels are skipped.

How To Fix It

Restructure the document headings to ensure that heading levels are not skipped.

The Algorithm...In English

A heading level is skipped (e.g., an <h1> is followed by an <h3>, with no intermediate <h2>). Note that an <h1> is not required to be the first heading within the document.

WCAG 2.1 Success Criteria:

[1.3.1 Info and Relationships \(Level A\)](#)

[2.4.1 Bypass Blocks \(Level A\)](#)

[2.4.6 Headings and Labels \(Level AA\)](#)

https://www.georgiancollege.ca/		<h3 id="login-modal-label">Log in to your Georgian College accounts</h3>

Possible heading

What It Means

Text appears to be a heading but is not a heading element.

Why It Matters

Heading elements (<h1>-<h6>) provide important document structure, outlines, and navigation functionality to assistive technology users. If heading text is not a true heading, this information and functionality will not be available for that text.

How To Fix It

If the paragraph is a section heading, use a heading element instead (<h1>-<h6>).

The Algorithm...In English

A <p> element contains less than 50 characters and is either:

- 20 pixels or bigger, or
- 16 pixels or bigger and bold and/or italicized.

WCAG 2.1 Success Criteria:

[1.3.1 Info and Relationships \(Level A\)](#)

[2.4.1 Bypass Blocks \(Level A\)](#)

[2.4.6 Headings and Labels \(Level AA\)](#)

Georgian Pages

Page	Text	HTML
https://www.georgiancollege.ca/		<p class="green-text large-text">89.7%</p>
https://www.georgiancollege.ca/		<p class="green-text large-text">6,200</p>

https://www.georgiancollege.ca/		<p class="green-text large-text">100%</p>

What It Means

A positive tabindex value is present.

Why It Matters

Tabindex values of 1 or greater specify an explicit tab/navigation order for page elements. Because it modifies the default tab order, cause confusion, and result in decreased keyboard accessibility, it should be avoided.

How To Fix It

If the natural tab order is already logical, remove the tabindex. Otherwise, consider restructuring the page so that tabindex is not needed. If tabindex is maintained, ensure that the resulting navigation is logical and complete.

The Algorithm...In English

A tabindex attribute is present and has a positive value.

WCAG 2.1 Success Criteria:

[2.4.3 Focus Order \(Level A\)](#)

Georgian Pages

Page	Text	HTML
https://www.georgiancollege.ca/ac		Skip to main content
https://www.georgiancollege.ca/fu students/		Skip to main content
https://www.georgiancollege.ca/		Skip to main content

YouTube video

What It Means

An embedded or linked YouTube video is present.

Why It Matters

For video content with audio, ensure that synchronized captioning is available. While YouTube can auto-generate captions using voice recognition, these are typically not of sufficient quality to be considered equivalent.

How To Fix It

Ensure that YouTube video presents equivalent, synchronized captions.

The Algorithm...In English

An embedded (within an iframe) YouTube video is present, or a link to a YouTube video is present.

WCAG 2.1 Success Criteria:

[1.2.1 Prerecorded Audio-only and Video-only \(Level A\)](#)

[1.2.2 Captions \(Prerecorded\) \(Level A\)](#)

[1.2.3 Audio Description or Media Alternative \(Prerecorded\) \(Level A\)](#)

Georgian Pages

Page	Text	HTML

https://www.georgiancollege.ca/fu students/		<iframe src="https://www.youtube.com/embed/fRkvXRd4tt4?enablejsapi=1&origin=https%3A%2F%2Fwww.georgiancollege.ca" frameborder="0" allow="autoplay;...

Broken same-page link

What It Means

A link to another location within the page is present but does not have a corresponding target.

Why It Matters

A link to jump to another position within the the page assists users in navigating the web page, but only if the link target exists.

How To Fix It

Ensure that the target for the link exists or remove the the same-page link.

The Algorithm...In English

An in-page link has an href attribute (starting with a #), but does not match either the id value of another element or the name attribute value of an anchor element within the page.

WCAG 2.1 Success Criteria:

[2.1.1 Keyboard \(Level A\)](#)

<https://www.georgiancollege.ca/>

```
<a href="#close" class="white-text green-back lp-simple-modal-close">x</a>
```

Long alternative text

What It Means

An image has very long alternative text.

Why It Matters

Alternative text should be succinct, yet descriptive of the content and function of an image. Lengthy alternative text (more than around 100 characters) often indicates that extraneous content or content that is not available to sighted users is being presented.

How To Fix It

Ensure the alternative text is succinct, yet descriptive. Ensure that no content is being presented in alternative text that is not available to sighted users viewing the image. When possible, either shorten the alternative text or provide the text alternative via another method (e.g., in text near the image, through a separate description page, etc.).

The Algorithm...In English

The image's alt attribute value is more than 100 characters. Note that the 100 character limit is a rough and somewhat arbitrary length. For images that present complex content or lengthy text, alternative text longer than 100 characters may be appropriate.

WCAG 2.1 Success Criteria:
